EDUCATION

UNIVERSITY OF PORT-HARCOURT
Bachelor of Science, Staticstics and Computer Science

Project on the application of Transportation Model in linear programming to time minimization. I estimated the time it would take to distribute furniture from four separate locations to a set destination. Using the Transportation Model, I obtained an optimum solution with the objective function being 13802mins, which is the time for a single trip against 18332mins for the maximum time.

EXPERIENCE

Coinpass   **United Kingdom**
UI / UX Expert   **January 2022 - August 2022**

- **Build** a **trading platform** from the ground up, helped the organization **migrate from its legacy platform** to a more future-proof platform taking into account customer reviews from marketing team.
- **Streamed data from the web socket API once in the application, distributing data via redux to other components. Increased page speed and reduced bandwidth.**
- **Implemented over 5 new trading features in new website which improved customer interaction.**
- **Tech Stacks Used: Github actions / Next.Js / Typescript / WebSockets / GraphQL / Tailwind css / AWS amplify / Agile / UI/UX**

fynGram   **Nigeria**
Full-Stack Developer   **March 2018 - June 2020**

- **Developed** a **social commerce application** which **increased sales within the company by ~24%, over 250+ customers completing KYC.**
- **Led** the technical team as we **designed and implemented web admin platform** that **improved the company's ability to track / analyse business growth** and make critical decisions ahead of time, reducing risk and panic decisions within the company
- **Led meeting sessions** with marketing team, plan strategic ways to **boost sales** by lunching sales day at discount prices. **Boost orders by 50+ and increase customer retention rate**.
- **Tech Stacks Used: Digital Ocean / Docker / Nest.Js / Typescript / React / Jest / socket.IO / SQL**

Starks Technologies   **Nigeria**
Frontend Lead Developer   **July 2021 - December 2021**

- **Lunched logistics application (SAAS)** which **boosted profit** as other companies bought a build of the application.
- **Guide** interns and junior developers as I **merged git commits**, ensuring **good folder structure** and naming conventions which **increased development speed and improved growth among team members.**
- **Hold brain storming** sessions with backend developers and UI/UX designer to ensure clear commuincation and product idea shared with team members during the SDLC.
- **Tech Stacks Used: Socket.IO / React / Typescript / SCSS / MongoDB / Github / Agile / Jest**

Fyn Technologies Ltd

Full-Stack Developer - Internship

Nigeria

August 2016 - July 2017

- **Build** front-end user facing interfaces with SCSS, worked with senior developers, **make provision for different webpages and screens responsiveness across the entire website**.
- **Researched** on different methods in optimizing page builds for production, **implemented strategies such as lazy loading of web pages, image compression, using webpack plugins to minify css files**
- **Engaged** in product road map with senior developers, **starte boiler plate backend codes and building MVP for escrow service.**
- <u>Tech Stacks Used: HTML, SCSS, WebPack, JavaScript, Node.JS</u>

TECHNICAL PROJECTS

- **fyngram app: https://play.google.com/store/apps/details?id=com.fyngram.mobile.app&hl=en_US&gl=US**
- **Coinpass trading website: https://coinpass.com/**
- **fynpay escrow service: https://fynpay.com.ng/**
- **freelance law-firm website: https://abiaprobate.com/**

ADDITIONAL INFORMATION

Youtuber   **2021 - Present**

- Enjoy **creative contents** ranging from **HTML** and **CSS**, to **javaScript** frontend frameworks such as **React** / **Angular** / **Vue** and backend technologies such as **Node.Js** / **MongoDB** etc.

Udemy Instructor   **2022 - Present**

- **Share** my knowledge with the development community and learning off other developers along the way

Andela Talent Network   **2022 - Present**

- Part of Andela greate community of talents, **hold interactive sessions and discuss latest trends** with fellow developers

SKILLS

TDD   React   Jest   TypeOrm   Node.JS   MongoDB   Nest.JS

CI/CD   Angular   TypeScript   PostGreSQL   scss   AWS   Github Actions
